We listen carefully to the voice from our customers and our partners.

About us

We are a pioneer in manufacturing the line-hardware products and its accessories for the T&D industry in Japan.

Since founded in Osaka Japan in **1947**, we have been developing, customizing and manufacturing variety of quality products such as ground rods, helical formed dead-end grips, ties, armor rods, taps, clamps, adaptors, for all major electric power distribution, telecommunication, and railway companies.

Quality, Trust and Loyalty

In addition, we have developed safe, reliable, useful hotline tools such as cable strippers, cutters, polishers, straighteners, benders which are usable in combination with hotline sticks, decreasing a lineman's risk of electric shock.
